FROM THE EDITOR'S DESK

At Hindustan International School, we are deeply committed to contributing to SDG 6 by fostering a culture of water conservation and sustainable practices. Our campus is equipped with rainwater harvesting systems to efficiently utilize natural resources and we conduct regular water audits to minimize wastage. Through engaging awareness campaigns and project-based learning, we encourage students to explore innovative solutions for water management. Eco-friendly infrastructure, such as low-flow taps and recycled water systems, further supports our sustainability goals. By integrating these practices into our daily operations and involving the broader community, we empower our students to champion the cause of clean water and sanitation for all.
