## FROM THE EDUCATOR

### My SECRET TO LEARNING NEW THINGS

We can learn new things at any time in our life if we are willing to be a Beginner. If we actually learn to being a beginner, the whole world opens up to us. How many of us willing to learn new things and how many of us become afraid to learn new things. The most common reasons that people resist to learn new things are; Fear of Failure, Push out from Comfort Zone, Fear of Loss Respect, Depends on Friends that he/she will do this for us, and Believe that we can't Learn at this Stage. But research shows that every one can learn at any stage of life if we are really passionate about to learn.

#### 1. learning while walking

Take a walk while you're listening to an audio book, a podcast, or even an online course. In fact, when I realized this was the easiest way to learn something new

#### 2. Implement as you go

Next biggest trick to learning as I go, is to actually implement what I'm learning.

#### 3. Acknowledge what you 're learning everyday

You're probably learning more than you're giving yourself credit for. So my final technique for learning new things is simply to acknowledge what I'm learning everyday by sharing new ideas with my business partners or creative peers or even just writing down "three things I've learned this week" in my notebook.
